

BACKGROUND

Somarelang Investments Ltd (SIL) trading as SIL Zambia is a Information Communications Technology company which focuses on implementation of IT business solutions. Technology, quality and solution integration are the differentiating factors of our corporate strategy.

We consult our clients to find the gap and offer the appropriate solution to close that gap. Our aim is to help the clients to concentrate on their core business where their competence lie and we do the rest. The strength of the SIL is significantly enhanced by the quality, size, and expertise and excellent track record of its extensive group of international solution provider partners and associates.

SIL Zambia as a player in the ICT industry offers strategic partnerships for Multinational companies, NGO's, Commercial Banks, Insurance firms, Mining firms, Government and Government Departments.

Mission Statement

To be the SADC's benchmark by providing professional fleet, fuel management, asset management, Network security, Capacity Building, Financial, Insurance, ERP, Rural telecommunication and integrated cost saving solutions through closing the identified gap. Together we strive to save security, fleet, fuel, asset and office cost

Vision

To be the best in business solution provider, and – through our people – build global competitiveness and an enduring difference in organizations we serve.

CHIEF EXECUTIVE OFFICER

Julius Chibanga brings a wealth of experience to Somarelang Investments Limited of over thirty years in road transportation, Government and Information Communication Technology industries. Having worked for United Bus Company of Zambia, Kariba North Bank Power Station now part of Zambia Electricity Supply Corporation Limited, Motor Holdings Zambia Limited a Ronrho Subsidiary then, Sundat Motors which was part of Guardian Motors, Central Transport Organisation under the Ministry Of Transport and Communications in Botswana, AST Botswana which was part of AST Group of South Africa and RPC Data Zambia a subsidiary of RPC Data of Botswana.

Julius was also actively involved in implementing a computerized accident assessment system called Audatex with Central Transport Organisation and also worked hand in hand with the IT Department to develop an accident data base in Dataflex for accident capture and analysis which made it possible for the production of yearly accident statistics. These formed the basis for accident and safety policy formulation. He was also a Project Manager for the Computerization of Botswana Government Vehicle Fueling System, eliminating manual intervention in the refueling process of vehicles. At RPC Data Zambia, he was charged with the responsibility of reviving the operations of RPC Data Zambia which had ceased and he quickly brought on board major Oracle users like ZESCO, ZRA, ZAIN, Zambia Army, NAPSA, Bank of Zambia, ZANACO, OOP etc offering them the much needed support and services.

He has an MBA from the University of Luton UK, HND in Engineering from Bolton Institute of UK and a Member of the Institute of Motor Industry UK, TEng Council of Engineering Institutions UK, Associate Member Institute of Road Transport Engineers and Member of Chartered Institute of Transport and Logistics.

- **ASSETWARE - ASSETWARE MANAGER** - AssetWare Manager, can be configured to manage the full lifecycle of any organisation's assets. With massive scalability, stable platforms and vast compliance to regulations, as well as different levels of licensing and implementation, AssetWare Manager can be scaled to meet the requirements of small, medium and enterprise organisations in all sectors. Designed to be easy to use, AssetWare software is highly customisable for individual and/ or global preferences.
- **ASSETWARE AUDITOR** - Gives you ultimate control over your assets. Valuable assets can now be monitored and managed more effectively
- **SOLARWINDS** - Orion NPM enables you to quickly detect, diagnose and resolve network performance problems and outages. It offers out-of-the-box network-centric views that are designed to deliver the critical information network engineers need. And Orion NPM is the easiest product of its kind to use and maintain, meaning you will spend more time actually managing networks, not supporting Orion NPM. Discover why a worldwide community of network engineers rely on Orion NPM and its expandable modules to monitor real-time statistics and the performance of their networks.
- **CITRIX** - The foundation of Citrix XenServer™ is the open source Xen® hypervisor, a proven and fully supported engine for server virtualization. XenServer is free enterprise-ready, cloud-proven server virtualization infrastructure that delivers the ten minutes to Xen experience of easy installation and intuitive XenCenter multi-server management, with flexible storage integration and open APIs that enable users to use their best-of-breed tools to enhance their enterprise system and storage management processes.
- **ORACLE** - Oracle Database 11g Enterprise Edition delivers industry leading performance, scalability, security and reliability on a choice of clustered or single-servers running Windows, Linux, and UNIX. It provides comprehensive features to easily manage the most demanding transaction processing, business intelligence, and content management applications. Oracle Database 11g Enterprise Edition comes with a wide range of options to extend the world's #1 database to help grow your business and meet your users' performance, security and availability service level expectations.
